

In this week we talked about necessary set up process to host our development server on Microsoft azure. We were also email ITS about getting the proper access to the production server at asm.camosun.bc.ca. Project charter has been approved and signed off. James worked on setting up the environment as well as working on exporting score from the awesominds system. Walker worked on redesigning the database and working on the functionality of the manage task page. Adam worked on dates for courses and chapters were able to be added to the system and made menus for them to be viewable.
